### Description

The AdvancedHMI line of panel PCs are specifically designed to provide maximum openness, reliability, and capabilities. The hardware has been designed with serviceability in mind with features such as a toolless quick release solid state hard drive. Pre-loaded with a Windows operating system that is configured for optimum performance as an HMI in an industrial environment. When used with the AdvancedHMI software, a flexible and cost effective machine interface can be achieved. Can also be used as a general purpose PC.
